DETAILED ACTION

Claim Rejections - 35 USC § 103

- 1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1, 3-8 and 10-15 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lapohn (U.S. Patent 5,770,797) in view of Fordyce (U.S. Patent 4,646,673).

Regarding claims 1,6,8, 13 and 15, Lapohn teaches an air pressure measuring system comprising a bracket structure (64), an air pressure gauge mounted to a bracket structure (16), a conduit that is in communication with at least one air pressure gauge (56) and an indicator (32 and Column 5, Lines 1-26).

However, Laphon does not explicitly teach a bracket structure mounted to an inside surface of a wheel rim. Fordyce teaches a pressure-indicating device that discloses a device that is indirectly and/or directly attached to a wheel rim (Column 9, Lines 1-52).

Since Laphon and Fordyce disclose systems for indicating air pressure in tires, it would have been obvious at the time the invention was made to a person having ordinary skill in the art to modify the invention taught by Laphon to include the device mounted to the inside surface of a rim as taught by Fordyce for the purpose of mounting the indicator within a visible range of an operator.

Application/Control Number: 09/978,377 Page 3

Art Unit: 2855

Regarding claims 3,4,10, and 11, Laphon teaches strips of reflective material/micro-prism retro reflective elements (30 and Column 4, Lines 52-65).

Regarding claims 5 and 12, Laphon teaches a Bourdon tube type pressure gauge (32).

Regarding claims 7 and 14, Laphon teaches an air pressure gauge including a pair of stop posts (39) and a mounting assembly to an inside surface of a wheel assembly (Figure 6).

2. Claims 2 and 9 are rejected under 35 U.S.C.103(a) as being unpatentable over Laphon (U.S. Patent 5,770,797) in view of Fordyce (U.S. Patent 4,646,673) as applied to claims 1 and 8 above, further in view of Evans et al. (U.S. Publication 2002/0139288).

Laphon, as modified, teaches the invention claimed except he does not explicitly disclose a bracket structure that is mounted to an inside surface of a wheel assembly by using adhesive tape. Evans discloses a bracket structure mounted to the inside surface of a wheel assembly by using adhesive tape (Page 3, Paragraph 38).

Since Laphon and Evans disclose wheel mounted tire pressure gauges, it would have been obvious to one having ordinary skill in the art at the time the invention was made to a person having ordinary skill in the art to further modify the invention taught by Laphon to include the structure mounted by adhesive tape taught by Evans for the purpose of securing the apparatus to the rim of a tire.

Response to Arguments

3. Applicant's arguments with respect to claims 1-15 have been considered but are most in view of the new ground(s) of rejection.

Application/Control Number: 09/978,377

Art Unit: 2855

Conclusion

Page 4

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Marissa L Ferguson whose telephone number is (703) 305-3194. The examiner can normally be reached on (M-T) 6:30am-4:00pm and every other (F) 7:30am-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Hezron Williams can be reached on (703) 305-4705. The fax phone numbers for the organization where this application or proceeding is assigned are (703)
